

VARD 7 313
Multi-Purpose Logistics Vessel

- The VARD 7 313 is a multi-purpose logistics vessel designed as a flexible platform to aid in force projection, maritime special operations, EEZ patrol, and humanitarian assistance. The vessel has significant capabilities for off-loading heavy equipment, carrying cargo, transporting troops, launching boats, and supporting aviation.

An internal ro-ro deck accommodates a variety of equipment including tanks, trucks, and ISO containers which can be efficiently loaded from a pier via ramps on the stern and vessel's side. Two full-breadth cargo holds located beneath the ro-ro deck provide extra storage capacity, while protected areas forward house expansive troop accommodations providing safe and comfortable passage for embarked personnel.
